Case Study: Urban Chawk Menu Navigation System

Background:

Urban Chawk, a newly opened food court, wants a simple menu navigation system to streamline customer orders. The system should allow users to choose between Fast Food and Sabzi Roti, redirecting them to respective ordering interfaces, along with an exit option to close the application.

Requirements:

- Graphical Interface with three main buttons: *Fast Food, Sabzi Roti, Exit.*
- Current Date & Time Display at the top.
- Full-Screen Mode for better user experience.
- Modular Design: Separate modules for Fast Food and Sabzi Roti, ensuring reusability.

Objective:

The system enhances customer experience by offering an efficient, structured, and user-friendly menu selection, ensuring smooth navigation between food categories.
